MAGNAFLOW® WATER PUMPS

CAM DRIVEN

BELT DRIVEN

The "Magnaflow®" is a self-priming, cam driven water pump featuring chrome brass construction, friction minimizing ball bearings, long lasting ceramic seals and a tough neoprene impeller. To accommodate a variety of engine types, the "Magnaflow®" comes standard with a large 1¼" hose inlet, tapped 3/4" NPT and a pair of 1/2" NPT outlets.

The "Magnaflow®" belt driven water pump is the replacement pump for the Neovane 755-A and is constructed the same as our "Magnaflow®" cam driven water pump.
